ABOUT US

At **Infinity Thread Industries**, we specialize in manufacturing high-quality polyester and nylon threads and twines, catering to a wide range of industrial applications. Our threads are engineered for strength, durability, and precision, making them ideal for stitching leather goods, woven sacks, garden pipes, and various uses in the agriculture and fishing industries.

Operating from our state-of-the-art 15,300 sq. ft. facility, we maintain a monthly production capacity of 80,000 kg, ensuring a steady supply of premium-quality threads to meet diverse industry needs. With a commitment to excellence, we ensure that our products meet the highest standards, providing superior performance and reliability for our customers.

Whether you require robust stitching solutions for heavy-duty applications or precision threads for specialized industries, **Infinity Thread Industries** is your trusted partner in quality and innovation.

Let us weave success together!

WHY CHOOSE US

Well Lubricated

Knotless

Quality Tested

Wide Range Of Colours

Quality Packing

Woven Sack & Fibc Jumbo Bag Thread

Woven sack stitching thread is a strong, durable thread used to sew polypropylene sacks, ensuring secure packaging of goods like grains and fertilizers. Made from polyester, nylon, or polypropylene, it resists heavy loads, abrasion, and environmental conditions, with some threads coated for smoother stitching.

Woven Sack
Stitching Thread

Bag Closing
Thread

Juki Thread

Products Name	Material Description	Application
Woven Sack Stitching Thread	840 Denier TO 3000 Denier	Woven Sack Bottom Stitching Bag
Bag Closing Thread	500/2, 600/2, 840/2 and 840 Single	Bag Closing Thread
Juki Thread	1000/2	FIBC Jumbo Bag Stitching Thread

High Strength Industrial Threads

Polyester and Nylon Thread are both popular types of strong, synthetic cords used for a wide range of applications. These two materials have unique properties that make them suitable for different purposes.

**Lifting Belt
Stitching Thread**

**Braided
Hose Pipe Thread**

Products Name	Material Description	Application
Lifting Belt Stitching Thread	1000/3 to 3000/3	Lifting Belt

Twine

Polyester and Nylon twine are both popular types of strong, synthetic cords used for a wide range of applications. These two materials have unique properties that make them suitable for different purposes.

Polyester & Nylon Twine

Seal Tag Thread

String Lasting Thread

Products Name	Size & Material Description	Application
Polyester & Nylon Twine	Size: 1/3, 2/3, 3/3, 4/3, 6/3, 8/3 to 42/3	Agriculture Nets, Fishing Nets, & Plant Support Thread
Tag Thread	Material: Polyester	Seal Tags, Gas Cylinder Safety Cap Thread

Sewing Thread

Experience the difference with premium lubricated sewing thread. Engineered for smooth, consistent stitching, this high-quality thread minimizes friction and breakage, resulting in durable, professional-looking seams.
